Profile

I am a dedicated and innovative Full-Stack Developer with a specialization in the MERN stack (MongoDB, Express.js, React, and Node.js) and good experience in Laravel. With a strong foundation in building dynamic, user-friendly, and scalable web applications, I possess a deep understanding of both front-end and back-end development, allowing me to create seamless and robust digital solutions.

My academic journey at AASTU has equipped me with a solid foundation in software development principles, enabling me to approach complex problems with a systematic and analytical mindset. I actively build and maintain a variety of projects, focusing on creating dynamic APIs, engaging user interfaces, and efficient database structures. I am passionate about collaborating with others, leveraging modern technologies, and continuously improving my skills to stay ahead in the rapidly evolving tech landscape.

Technical Expertise:

- Front-End: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind
- Back-End: Node.js, Express.js, Laravel (PHP)
- Databases: MongoDB
- Tools & Platforms: Git, VS code, RESTful API development
- Additional Skills: OAuth and authentication strategies, unit testing and UI design
